BIBLIOGRAPHIC AND CASE LAW CITATIONS

Citations should be included throughout the text, using footnotes. No final bibliography should be added.

a) Reference to a book: indicate the author’s name(s) initial letter only, followed by the surname(s) in round hand (not italics). Afterwards, write the complete title in italics. Then, if applicable, indicate volume and/or part in round hand. Then, specify edition number (only from 2nd onwards), publishing house, place and date of publication, followed by the specific page number/numbers if applicable (use p. or pp.).

b) Reference to a collective publication: the same format as in a), the specific title being enclosed in quotation marks and in round hand, followed by the “in” particle in round hand, plus the title of the general publication in italics.

c) Reference to a journal article: the same format as in b), adding if necessary, journal number, volume, date and pages cited.

d) Reference to case law: indicate the court that gave judgement and, if needed, the concrete section in brackets. Then, write the type of decision, its reference number and the date of its adoption, adding the case name in brackets where appropriate.

- Example: ECHR (Grand Chamber). Judgement 9 July 2013 (Vinter and others v. the United Kingdom)
TS (Sala de lo Penal). Sentencia nº 215/2012 de 12 de febrero de 2012

The lectures and the selected contributions will be published by Tirant lo Blanch; that is why we recommend, where appropriate, the use of its case law database and the inclusion of the correspondent reference (TOL) when citing.

- In order to avoid repetition, the “op. cit.” expression should be used in italics when citing the same publication more than once
